

What this is still missing:

- How to contact repairmen
- admin dashboard details,,,because how???
- need to know if it needs to have a mobile view as well
 - questionnaires after scans
 - table displays/order
 - peer review of all these designs
- someone tell me what I'm doing I'm not an artist how did I get into design
- like don't get me wrong I'm so proud of myself for this but like, is any of this understandable? Anyone?? Help it's enough for the squad to start designing right?

Sign In

Employee ID:

Passcode:

[Forgot Passcode](#)

passcode should be generated,
and then asked to be changed
the first time someone signs in,

opens a page that shouldn't be
accessible from the banner.

Also opens a page not
accessible from the
banner. asks for Employee
ID, then alerts manager,
who can confirm and then
send an email to have their
passcode reset

Appears after they
enter the ID.
